グイサギ(大鷺)
サギ科 L=90cm

A group of approximately ten Hamashigi (滨鹬) birds are shown in a coastal environment. Some birds are perched on dark, wet rocks, while others are standing in shallow, rippling water. The birds have a mottled brown and white plumage and long, thin black bills. The water is a clear blue-grey color, and the rocks are dark and textured. The overall scene is brightly lit, suggesting a sunny day.

ハマシギ(滨鹬) シギ科 L=21cm

A photograph of three Hamashigi (滨鹬) birds in a shallow, rocky tidal pool. The birds are small, with brown upperparts and white underparts. They are standing in the water, which is reflecting the sky. The rocks are dark and jagged. The water is a light blue color. The birds are positioned in the middle ground, with one on the left, one in the center, and one on the right. The bird in the center is looking towards the right. The bird on the left is looking down. The bird on the right is looking down. The text "ハマシギ(滨鹬) シギ科 L=21cm" is overlaid at the bottom of the image in yellow.
