

2019.01.03 福岡市西区・今津干潟のヨシガモ、タゲリ、ハマシギ

A photograph of two ducks swimming in a body of water. The duck on the left is a female mallard (Yoshigamo), characterized by its mottled brown and tan feathers and a dark bill. The duck on the right is a male mallard (Gankamo), showing more vibrant plumage with iridescent blue and green on its wings and a prominent red patch on its neck. The water is dark green with ripples and reflections of the ducks.

A male Green-winged Teal duck is shown in profile, swimming in a body of water. The duck has a distinctive reddish-brown cap and a green face. Its body is covered in intricate, wavy patterns of grey and white. The water is dark green and shows ripples around the duck. A small stream of water is dripping from the tip of its dark beak. The duck's reflection is visible in the water below it.

A photograph of two Hamashigi (滨鹬) birds on a muddy shore. The birds have brown upperparts and white underparts. One bird is standing on a raised bank of mud, while the other is standing in a shallow pool of water, drinking. The water reflects the birds and the surrounding environment. The background shows more of the muddy shore and water.
