ヒドリガモ(緋鳥鴨) ガンカモ科 L=49cm

A white heron (Herasagi) is shown in profile, standing in shallow, rippling water. The bird has a long, dark beak and is leaning forward, with its beak touching the water's surface. Its legs are dark and long. The water is dark and reflects the light, creating a textured background. The overall scene is a naturalistic depiction of the bird in its habitat.

ヘラサギ(篋鷺) トキ科 L=86cm

A white heron with a long black beak and a crest of feathers, walking on a muddy, wet ground. The bird is facing left, and its long legs are visible. The ground is dark and reflective, suggesting it is wet. The background is a vast, flat expanse of similar ground, extending to the horizon.

クロツラヘラサギ(黒面篋鷺)
トキ科 L=77cm

A photograph of two white birds, likely swans, wading in shallow, rippling water. The birds are positioned in the center of the frame, facing each other. The water is a deep blue-grey color, and the background shows a vast expanse of water with some darker patches. The lighting is bright, creating clear reflections of the birds on the water's surface.
